FHM 5 is incredibly deep and fun to play. I consider myself quite a big hockey fan, despite having never played. Therefore tactically I am probably lacking. However, challenge mode is a blast. The game is incredibly deep and at times frustrating, but I guess that's the life of a GM. However, I must say that the auto lines make some odd decisions!

The only real negative I have is that after deleting a game and attempting to create a new game, I get a "game name already exists message"... quite a pain!

I also hope to see more of an online presence in the future with team recommendations and such, what tactics are best, players, etc etc.

All in all great fun.. Highly unstable. Game crashes randomly and frequently to desktop, with a dubious pop up message inviting you to send an error report to the developer. Had to rely on a game walkthrough video on youtube for an explanation of the plot at that one point towards the end of the game, at the cells, as I could never get a proper explanation of the plot by the characters without the game crashing. Had to save the game at every single stage, after every major plot sequence or dialogue, to avoid having to repeat the segment. The game feels unfinished - like they had never worked out how to fix the bugs.

The character models only wear one outfit throughout the entire game, even though the story takes place over several locations and several days. The female protagonist has the most awful outfit. Minor characters all look alike (guards and soldiers). A couple of the high tech puzzles have instructions that make no sense - at least there was an option to skip the puzzles, otherwise I wouldn't know how I could have got through the game, regardless of the game crashes.

The only things nice about this game are the story, the characters, the textures, the location graphics, the movie sequences and the dialogue.

Only buy this game as part of the Publisher bundle as they do have nice adventure games.. This game is really great for tons of people, mainly gays and women, but not me!. Runs perfect if installed correctly with GOG GALAXY + you get free bonus games. Steam using fake reviews for this broken version.

<https://steamcommunity.com/games/593110/announcements/detail/1808664240333155775>. Really fun, really hard. The solo is epic and the chords have you going all over the place.. NEEDS SAVE FEATURE!! TOO HARD. HOW DO I GET LOGS?!. I can't go full screen OR figure out the second boss.

[However, the game is really cool despite that and I am hoping they address some of these issues.](#)

[An excellent start.](#)

A love letter to Quake 3 Arena, except you can finally hit an enemy since everything is so clean. eBall is fairly simple yet overall mechanically solid arena shooter with bright, clear graphics, a nice soundtrack, and some solid level design. A satisfying game which is pretty fun and addictive, since there's no downtime and you can instantly get back in action.

Devs are active on discord so I can only assume they'll keep working on implementing new features and adding new maps. If you like simple time-wasting games that'll work in the office as well as at home then you'll have a BALL.. So i bought this game, and after a while it started glitching and i couldn't play it. I requested a refund, since it didn't work. And didn't get my money back but yet still here I am. I don't have the game anymore and I didnt get my money back. That's just scam.. Ok so first off I liked the game, but I had trouble picking things up by pressing E and I just noticed it says I played for over 2 hours when I only played 30 minutes just seems strange to me.

This is my review anyways:

[I wish A Sunny Day is Watching Over You was extended though.. I'm giving this a positive recommendation with a caveat: there's bit of a frustration factor](#)

[What's frustrating about it:](#)

[-Many objects on screen \(the ship, enemies, bullets\) are rather bulky which oftentimes leaves little room to maneuver.](#)

[-The space ship doesn't move very quickly, so you're handicapped by less-than-avg speed when dodging obstacles.](#)

[-There's so much on-screen clutter, it might be a little confusing by what are collectables and what are harmful objects. Also sometimes you're not sure what exactly is part of the background and what is in the foreground.](#)

[What's good about it:](#)

[-The visuals are stunning: very vibrant colors and mostly nice level designs for a schmup](#)

[-OST is fantastic, fitting to the game for the most part](#)

[-The challenge isn't over-the-top unfair although it's still quite challenging \(still yet to try advanced difficulty level\), but fun enough to play](#)

[-Power ups are REALLY helpful, especially when you're powered to full capacity, then it's blast to go through the levels.](#)

[Also note:](#)

[There's a minor learning curve to the game, in which you need to acclimate to the shield and what exactly the shield can absorb, along with the controls and bulky objects.](#)

[I'd give this a solid 8/10. Couldn't figure out how to close the menus and the build menu covers 1/4 of the screen. Maybe make it slightly translucent at least? Very small resolution and maximizing the window makes everything blurry \(on 1440p display anyways\). I like the concept though. Just needs more work to improve the game experience. There is no tutorial but you can goof around and figure some stuff out. Feels more like a demo than a game. Maybe 2\\$ is worth that to some people but not for me.. A surprisingly fun and well rounced racing game that manages to scare you half to death with both rhinos and semi trucks... well played developers.](#)

[-DoItAll on Youtube. Weeeell, I don't really recommend this game. It has aged, but not exactly gracefully. It's not horrible either. But it just isn't really good either.](#)

[For 5/20ac, it's too little. I bought it in the Popcap Bundle, so it was alright, I guess?](#)

[Still, for demanding 5/20ac and then giving you relatively monotonous gameplay... it's too much money. It's just too much for so little actually happening. That's why I wouldn't recommend buying this game.](#)

[Oh, and just for the sake of completion: You play as one of four heroes to save the Iggles, a race of furry little creatures color-coded and caught in bubbles by some kind of evil force. Yeah. That's the sum of it. You move through a little labyrinth, collect the Iggles, avoid the baddies, and send the Iggles home with the appropriate home fields.](#)

[And... that's it. For 101 levels in Adventure mode. Yay.](#)
